

# Angling Indiana - 2009 FISH CONSUMPTION ADVISORY

## Orange County- advice for sensitive populations\*

| Waterbody  | Fish Species                    | Fish Length (inches) | Maximum Amount for Adults to Eat** (Meals) |
|--|---------------------------------|----------------------|--|
| <b>All Indiana Rivers and Streams</b> (unless specified) | <a href="#">Carp</a>            | ALL                  | 0  |
|  | <a href="#">Bluegill</a>        | Up to 7              | 8 ounces per week (1 meal/week)            |
| <b>Patoka Reservoir</b>                                  | <a href="#">Carp</a>            | ALL                  | 0  |
|  | <a href="#">Freshwater Drum</a> | Up to 16             | 8 ounces per week (1 meal/week)            |
|  | <a href="#">Yellow Bullhead</a> | Up to 10             | 8 ounces per week (1 meal/week)            |
| <b>Tucker Lake</b>                                       | <a href="#">Warmouth</a>        | Up to 7              | 8 ounces per week (1 meal/week)            |

\*Sensitive populations include: pregnant or nursing women, women that will become pregnant, and children under 6 years of age. These consumers should use caution when eating some types of sportfish.

\*\*The maximum amount for adults to eat is determined by fishing location, species and fish length. For instance, if you eat the maximum amount of one species during a week, you should not eat any other fish which has a consumption limitation until the following week. Example - if you eat the limit (4 ounces) of a 20 inch long Carp from the Easy Catch River, then you should not eat any other sportfish from the list until the following week.
