<b>Pigeon Creek</b> (St. Joseph River Basin)	<a href="#">Carp</a>	21+	0
<b>Pleasant Lake</b>	Bullhead	12+	0

\*Sensitive populations include: pregnant or nursing women, women that will become pregnant, and children under 6 years of age. These consumers should use caution when eating some types of sportfish.

\*\*The maximum amount for adults to eat is determined by fishing location, species and fish length. For instance, if you eat the maximum amount of one species during a week, you should not eat any other fish which has a consumption limitation until the following week. Example - if you eat the limit (4 ounces) of a 20 inch long Carp from the Easy Catch River, then you should not eat any other sportfish from the list until the following week.
